ABSTRACT: So far the review on the article I have read

ARXIV EPRINT: [I wish](#)

Contents

1	Black hole perturbation toolkit	1
2	Analytic Black Hole Perturbation Approach to Gravitational Radiation	1
A	Some title	2

1 Black hole perturbation toolkit

In this section a summery on [?] has been provided.

2 Analytic Black Hole Perturbation Approach to Gravitational Radiation

This is a huge paper [?] a review on that also might requied some refence from here and there

Figure 1. Always give a caption.

x	y	x and y
a	b	a and b
1	2	1 and 2
α	β	α and β

Table 1. We prefer to have top and bottom borders around the tables.

We discourage the use of inline figures (e.g. `wrapfigure`), as they may be difficult to position if the page layout changes.

We suggest not to abbreviate: “section”, “appendix”, “figure” and “table”, but “eq.” and “ref.” are welcome. Also, please do not use `\emph` or `\it` for latin abbreviatons: i.e., et al., e.g., vs., etc.

Up to paragraphs. We find that having more levels usually reduces the clarity of the article. Also, we strongly discourage the use of non-numbered sections (e.g. `\subsubsection*`). Please also consider the use of “`\texorpdfstring{\{}}`” to avoid warnings from the `hyperref` package when you have math in the section titles.

A Some title

Please always give a title also for appendices.

Acknowledgments

This is the most common positions for acknowledgments. A macro is available to maintain the same layout and spelling of the heading.

Note added. This is also a good position for notes added after the paper has been written. c
